Allowable Subject Matter

1. Claims 1-6, 8, 9, 11-16, 18, 19, 21-26, 28, 29, 31, 33-40 and 61 are allowed.
2. The following is an examiner's statement of reasons for allowance:

In interpreting the claims, in light of applicants' arguments and the Specification the examiner finds the claimed invention patentably distinct from the prior art of record. The prior art teaches the invention substantially as claimed. However, the prior art fails to teach or suggest either alone or in combination a method and system wherein receiving, from the server, first information indicative of a version of the application, comparing the first information with information stored on the handheld, and updating the application on the handheld device using metadata received from the server if the first information does not compare equally with the information that is indicative of the version of the application on the handheld device. More particularly, Huang fails to teach updating the application on the handheld device; rather Huang modifies the data from the application. Shupak fails to teach comparing information received from the server with information stored on the handheld indicative of the version of the software, and updating the software based on metadata received from the server. In Shupak, the handheld device issues a query for locating solution access for use in updating software. The examiner finds applicants' arguments filed June 26, 2008 (page 14, lines 14-22) and arguments filed January 31, 2008 (page 14, lines 9-27).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for

Art Unit: 2144

Allowance.”
